Advanced Cigar Sommelier (ACS®)

Predictive Modeling & Advanced Diagnostics

Program Overview

ACS® builds upon CCS® and introduces predictive modeling of blend architecture, aging behavior, and environmental influence.

Advanced Competencies

• Blend-family classification and RH modeling
• Boundary-zone cigar behavior
• Aging-adjusted peak shifts
• Multi-zone humidor system design
• Applied tasting calibration

Who It Is For

Certified professionals seeking institutional-level mastery and those positioning themselves as consultants or educators.

Outcome

ACS® graduates predict peak-flavor RH across brands and vintages and design precision staging systems with authority.
