

Discover where your SME stands on the journey from manual operations to predictive intelligence.

This assessment reveals the 10 critical dimensions that separate industry leaders from those still struggling with spreadsheets.

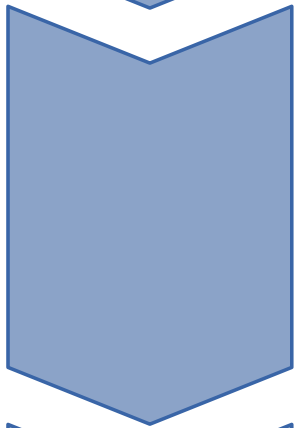

Swipe through to evaluate your organization's digital planning and execution capabilities. Rate by selecting the option that most suits your current status, noting the assigned score. Contact our team stating the achieved average score. 🙌

Data Visibility & Integration

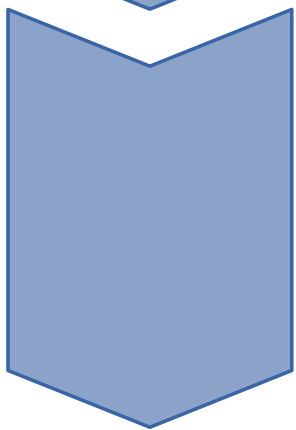

1= Manual / Ad hoc

Data trapped in disconnected spreadsheets across departments. No unified view of operations.

3= Partially Digital

Some systems connected, but gaps remain. Multiple sources require manual reconciliation.

5= Integrated / Predictive

Single source of truth across the enterprise. Real-time data flows seamlessly between all systems.

Planning & Forecasting Maturity

1= Gut Feel / Excel

Decisions based on intuition and basic spreadsheet models. Limited historical analysis.

3= Basic Statistical Forecast

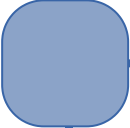

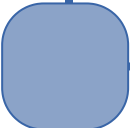

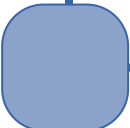

Using historical patterns and simple algorithms. Some demand sensing capabilities.

5= AI-Augmented IBP

Integrated Business Planning powered by machine learning. Predictive accuracy and scenario modeling.

Shopfloor & Operations Visibility

-  **1= No Real-Time View**
Production status unknown until shift reports. Reactive problem-solving only.
-  **3= Manual Dashboards**
Periodic updates require manual data entry. Delayed visibility into operations.
-  **5= Live IoT Tracking**
Real-time monitoring of all equipment and processes. Predictive maintenance alerts.

Supply Network Collaboration

1= Email Chains

Supplier communication through endless email threads. Version control nightmares and delayed responses.

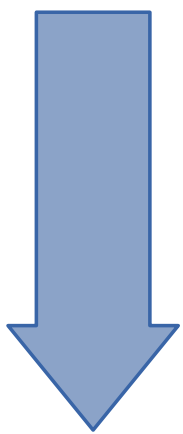

3= Shared Files

Cloud storage for documents. Better than email but still requires manual coordination.

5= Cloud Portals / VMI

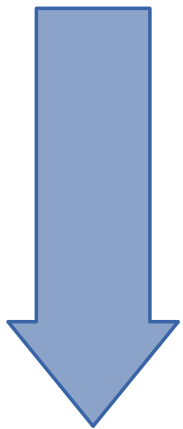

Vendor-Managed Inventory with real-time visibility. Automated replenishment and collaborative planning.

Automation & Workflow Evolution

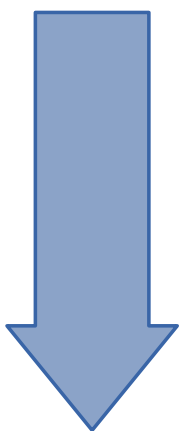

1= Paper / Email Approvals

Manual routing of documents. Bottlenecks and lost requests common.

3= Partial RPA

Robotic Process Automation for select tasks. Islands of efficiency in manual processes.

5= End-to-End Automation

Fully automated workflows with intelligent routing.
Exception-based management only.

Analytics & KPIs Sophistication

1= Lag Reports

Monthly reports showing what already happened. No actionable insights for future decisions.

3= Descriptive Dashboards

Real-time KPI tracking with historical trends. Understand current state clearly.

5= Predictive Insights

AI-powered forecasting and prescriptive recommendations. Know what will happen and what to do.

Decision-Making Culture & Technology

Culture Maturity

- 1= Reactive

Fire-fighting mode.
Decisions made in isolation.

- 3= Cross-Functional Reviews

Occasional collaboration.
Some data consideration.

- 5= Data-Driven Governance

Analytics-first approach.
Structured decision frameworks.

Technology Landscape

- 1= Legacy ERP

Monolithic systems. Difficult to adapt or integrate.

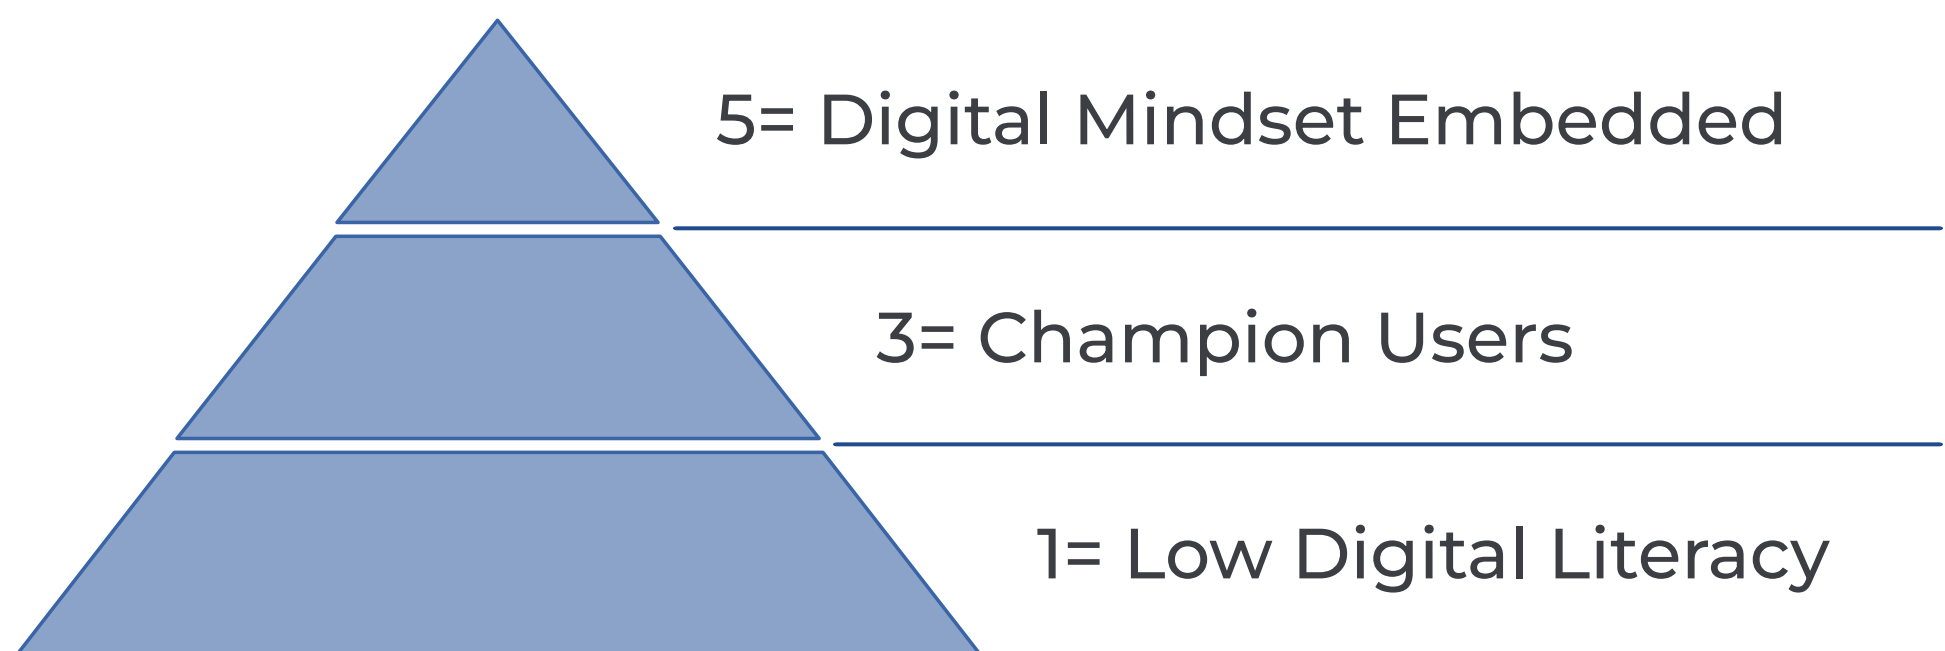

- 3= Add-On Tools

Point solutions. Some integration challenges remain.

- 5= Modular Cloud Ecosystem

Flexible, scalable architecture.
API-first integration.

People & Skills Development

Your team's digital capabilities determine transformation success. Moving from basic computer skills to embedded digital-first thinking requires intentional development programs and cultural change.

Innovation & Continuous Improvement

1= Ad Hoc Projects

Sporadic improvement initiatives without structure

3= Periodic Reviews

Scheduled assessments and planned improvements

5= Embedded Kaizen Loop

Continuous improvement culture with systematic innovation
